INSTITUTE OF GEOLOGICAL SCIENCES

Exhibition Road, London SW7 2DE

Murchison House, West Mains Road,
Edinburgh EH9 3LA

The full range of Institute publications is displayed and sold at the Institute's Bookshop at the Geological Museum, Exhibition Road, London SW7 2DE, and listed in HMSO's Sectional List 45.

The Institute was formed by the incorporation of the Geological Survey of Great Britain and the Geological Museum with Overseas Geological Surveys and is a constituent body of the Natural Environment Research Council

This is the first (provisional) volume of a new series of statistical tables replacing the Statistical Summary of the Mineral Industry, last published in 1973

All communications regarding this publication should be addressed to the Head, Mineral Statistics and Economics Unit, Institute of Geological Sciences, Exhibition Road, London SW7 2DE

EXPLANATORY NOTES

Coverage

A somewhat smaller range of minerals and less detail on commodity subdivision is shown than in volumes of the *Statistical Summary of the Mineral Industry*, the predecessor of this new series. (This is particularly so in the case of trade tables.) However, users of this compilation are advised that, at least for the years up to 1974, the full coverage of the *Statistical Summary* is held on file in the Mineral Statistics and Economics Unit and is available for consultation. Where figures are shown in the tables as 'estimated' the source of the estimate is not generally given.

Arrangement of countries

In each table, after the United Kingdom, countries are ordered alphabetically in geographical groupings as follows:

European Economic Community (EEC)
Europe other than EEC and including the Soviet Union
Africa
North and Central America, including the Caribbean
South America
Asia
Australasia, including the Pacific Islands.

So far as possible the nomenclature follows the London Diplomatic List and United Nations usage.

Production of metals

Bauxite, chromium, iron and manganese are shown in the tables as gross ore mined. Mine production of other metals is expressed as metal content (or equivalent). In addition, metal production (which may be derived from both domestic and imported ores), is given separately in the case of copper, iron, lead and zinc. So far as possible, the data given refers to primary metal production.

Trade

South Africa Where export data are not available from the Department of Mines, they are taken from the trade statistics of the common customs area, which includes Botswana, Lesotho, South Africa, Namibia, and Swaziland, and relate to this area as a whole.

USA 1974 import data refer to 'General Imports' but for the years 1970-73 the data given are 'Imports for Consumption'.

Mexico Foreign imports into the Mexican Free Trade area (Las Zonas y Perímetros Libres) have not been included in the coverage of Mexican trade.

General Although every effort has been made to provide comprehensive coverage of trade statistics the resulting trade compilations depend on the nature of the data available. In particular the absence of import or export figures for any country from the tables does not necessarily imply that there is no trade in that commodity, only that the item has not been separately identified in the available trade statistics.

Acknowledgements

Compilation of this volume of mineral statistics has been possible only by obtaining information from a very large number of organisations throughout the world, chiefly home and overseas government departments and specialist national or international authorities concerned with particular sectors of the minerals or metals industries. To all these bodies the Institute expresses its grateful acknowledgement for the information made available, whether in published form or provided by direct correspondence.

Among the numerous overseas government departments which have provided valuable information, particular acknowledgement is made to the United States Bureau of Mines; the Department of Energy, Mines and Resources of Canada; the Bureau of Mineral Resources, Geology and Geophysics of Australia; the Department of Mines of South Africa; the Indian Bureau of Mines; and the Mines Departments of other countries whose regular statements, yearbooks and other reports are worthy of direct consultation by readers in search of detail.

Specialist commodity organisations which have kindly allowed information to be reproduced, and whose own publications contain a wealth of authoritative data, include the World Bureau of Metal Statistics, the British Sulphur Corporation, Samuel Montagu & Company Ltd, the British Steel Corporation/Iron and Steel Statistics Bureau, the International Tin Council, ISMA Ltd, Metallgesellschaft AG, the UN Food and Agricultural Organisation, and the UNCTAD Committee on Tungsten.

Units

The statistics shown in this volume are expressed in metric units. The following factors are given for converting to non-metric units:

Tonnes $\times$ 0.9842 = long tons

Tonnes $\times$ 1.1023 = short tons

Kilogrammes $\times$ 2.2046 = pounds

Kilogrammes $\times$ 32.1507 = troy ounces

Cubic metres $\times$ 35.31467 = cubic feet

1 tonne of crude petroleum equals on average 7 barrels crude petroleum

PREFACE

For over 50 years the Mineral Resources Division has compiled – and made available for the information of government, industry and the public – detailed statistics of the production and trade of minerals throughout the world. The well-known series of annual publications, the *Statistical Summary of the Mineral Industry: World Production, Exports and Imports*, began with a volume containing particulars for the years 1913–18 and concluded with the edition issued in 1973 for the period 1966–71.

During the last four years the small staff of specialists in the Mineral Statistics and Economics Unit, in addition to producing a regular annual compilation, *United Kingdom Mineral Statistics*, has been gradually assembling information for a new series of publications called *World Mineral Statistics*. I am now pleased to introduce the first of the series: this present volume. Its coverage is broadly similar to, and indeed deliberately overlaps, that of the previous series in order to maintain the comparability and continuity of information. On the other hand, its format has been changed and harmonised with the numerous other works published by the Institute; its contents are completely metricated; and the names and order of countries presented are in keeping with the modern world, distinguishing, for example, the United Kingdom as a member of the European Economic Community. Information is given on most minerals of economic importance and the range of materials covered will be further extended in the next edition planned to follow soon after the first.

The primary object of this work remains what it always has been: to present as comprehensively and accurately as possible factual data about the world mineral industry's activities, which are essentially the end-product of geology and a measure of the unceasing contribution of the geological sciences to man's material welfare and progress.

Notes:

1. Except where alumina hydrate is separately specified, national trade figures for alumina can be considered as inclusive of hydrate.

2. In this table the description "unwrought" aluminium corresponds to item 684.1 of the Standard International Trade Classification (revised) and comprises ingots, blocks, unwrought bars, etc.

(a) Including alloys

(b) Imports for consumption

(c) General imports

(d) Excluding imports from Belgium-Luxembourg, if any

(e) Years ended 31 March following that stated

(f) Years ended 30 June of that stated

Notes:

1. The production data in this table does not include calculated trioxide equivalents for output reported as arsenic metal.
 2. Arsenic is known to have been produced also in the following countries: Argentina, Austria, Belgium, China, Czechoslovakia, German Democratic Republic, Finland, Hungary, Rhodesia and United Kingdom.
- (a) Exports
 (b) Excluding metallic arsenic
 (c) Output of Tsumeb Corp. only trioxide equivalent of reported black arsenic
 (d) Years ended June 30 of that stated
 (e) Trioxide content of ores

Note: In this table the description "unwrought" copper corresponds to item 682.1 of The Standard International Trade Classification and includes both blister and refined copper. Additionally the term "unwrought" as used here includes alloys unless these are separately specified.

(a) Including matte

(b) Cu content

(c) Years ended March 20 of year following that stated

(d) Year ended June 30 of that stated

(e) See South Africa

(f) Department of Mines figures for South Africa; Cu content

(g) Department of Customs & Excise figures; these include data not only for South Africa but also for Botswana, Lesotho, Namibia & Swaziland.

Note: In this table the description "unwrought" copper corresponds to item 682.1 of the Standard International Trade Classification and includes both blister and refined copper. Additionally the term "unwrought" as used here includes alloys unless these are separately specified. The term "scrap" includes scrap alloys.

(a) Including matte

(b) Including alloys

(c) Including semi-manufactures

(d) Including wire

(e) Cu Content

(f) Excess of exports

(g) Years ended March 31 following that stated

(h) Years ended March 20 of year following that stated

(i) Years ended June 30 of that stated

(a) Including anhydrite

(b) Including alabaster

(c) Crude estimated from production of calcined gypsum

(d) Producer's shipments

(e) Years ended March 20 following that stated

(f) Excluding gypsum produced in Algeria, Cuba, Ethiopia, Honduras, Jordan, Lebanon, Mongolia, Romania, Switzerland and Zambia

Note:

Figures shown in this table refer to gross tonnage of ore mineral; estimated average Mn content is given in parentheses for each country.

(a) Shipments of manganiferous iron ore only

(b) Years ended March 20 Following that stated

(c) Excludes Cuba and Socialist Republic of Vietnam

(d) Manganiferous iron ore

(e) Includes metallurgical, chemical and ferruginous ores

(f) Includes ore grading 54% to less than 35% Mn

(a) Refined

(b) Production from Coronation Syndicate Mines only for years ending September 30 of that stated. There are other mines in Rhodesia known to produce silver but information is insufficient to include these in a national estimate

(c) Accounted for by smelters, years ended June 30 of that stated

(d) Recovered as a by-product of base metal refining.

(e) Recoverable

World total (all forms)		38 800	39 300	42 200	45 500	48 500

(a) "Spent Oxide"

(b) Includes 'caliche' at 45% S content

(c) From smelter gases

(d) From petroleum refining

(e) From natural gas

(f) Caliche

(g) Includes S content of "sulphur ore"

(h) Exports

(i) Shipments

(j) From lignite distillation

(k) Refined

Note: Pyrites: nominal sulphur content is shown in parentheses

World total (g)	10 000	11 000	16 000	24 000	24 000

Note: Niobium and tantalum ores are believed to have been produced also in the Soviet Union, and minor quantities in Burundi, India, Spain, Rhodesia, Somalia, Namibia, USA and Zambia.

(a) Exports

(b) Including columbo-tantalite content of tin-tantalite-columbite

(c) Nb₂O₅ content

(d) Ta₂O₅ content

(e) Imports into USA

(f) Sales

(g) Expressed as weight of concentrates produced; Canadian concentrates have been taken as approximately twice the weight of oxides content

(a) From a mixed copper-zinc concentrate. A small quantity of zinc may be produced in addition to that shown

(b) Recoverable

(c) Smelter

(d) Exports

(e) Zinc ore is also produced in Czechoslovakia, Romania and Socialist Rep. of Vietnam

(f) Includes production for last 5 months of 1973

(a) Exports

(b) Borates are also known to have been produced in Federal Republic of Germany, Iran and Tibet

(c) Sold or used by producers

(d) Production from primary material of both domestic and foreign origin

(e) Selenium is also produced in Australia

(f) Including Se content of compounds

(g) Including Te content of compounds

(h) Uranium is also known to have been produced in other countries including China, Federal Republic of Germany, Finland, India, Italy, Mozambique, Soviet Union, and Sweden

(i) Producer's shipments
